

Friday 14<sup>th</sup> September 2018

Dear Parents and Carers,

At Burdett-Coutts, we are raising the profile of Science and are aiming to promote investigative work and research both at school and at home. Each half term, children across the school will be given:

- a fun investigation to complete by their class teacher and will be given the opportunity to present their work during a whole school assembly.
- a half termly competition that will involve some building / modelling at home which will then be presented at school.
- a research project about a scientist linked to your child's topic in Science. Don't forget that this can be anyone – male or female, and from anywhere in the world.

This half term we are exploring **FLIGHT** and we will see which helicopter or mouse can stay in the air for the longest and investigate what we can do to make them stay in the air longer.

Through these investigations, we hope to build upon the children's existing curious, inquisitive minds developing further their love of science.

We thank you in advance for your support and hope that you enjoy being creative.

Many thanks,

Miss Sweeney and Miss Matthey  
Science coordinators
